# REIGNITED DREAMS

As India's power demand surges, Adani Power revives old ambitions while its fortunes turn for the better

AMRITHA PILLAY  
Mumbai, 2 April

Adani Power, part of the Adani group, plans to add close to 6 gigawatts (Gw) of new power assets in the next five years, according to an investor presentation by the company. That is clearly meant to ride on India's burgeoning power demand. But there is another side to it: All of this new capacity is expected to be thermal power, or power produced from coal.

Adani Power is not alone in this. A Reuters report dated March 4 said Adani Power was one of three private producers — the others being JSW Group and Essar Power — to have told the

power ministry they were keen to build at least 10 Gw of coal-fired power capacity over a decade, ending six-year drought in significant private investment in the sector.

However, Adani's plans, said Reuters, were bigger than JSW's and Essar's. The report quoted a spokesperson for the power ministry assaying the private sector had agreed to invest in the coal-fired power sector "in line with the energy requirements of the nation," and that India was ahead of international commitments to cut emissions.

Overall, Adani Power plans to operate more than 21 Gw of thermal capacity by 2029-29 (FY29), up from 15.2 Gw at present. The Adani Group's

green energy business is housed under Adani Green Energy, which has 5,614 Gw of solar capacity and 1,275 Gw of wind power, and another 2,140 Gw of hybrid.

At present, the largest power producer in the country is NTPC with 75 Gw capacity and the largest private sector player is Adani Power, with Tata Power a close second.

A spokesperson for Adani Power declined to comment on this story. However, in a call with analysts in November last year, the company called itself "debt-light" and "now poised to take off successfully for the long haul as India's power demand grows strongly in line with its economy."

**The turnaround**

Adani Power intended to achieve 20 Gw capacity by 2020 as stated in some of its annual reports from FY16 onwards. However, along the way it got caught up in concerns related to state discom health, fuel availability, and its debt situation. It did not commission any significant new capacity between FY15 and FY19, company data shows. Instead, in the year 2020, as the Covid-19 pandemic raged, the company was preparing a de-listing plan.

In May 2020, the company's promoters announced the delisting and said it would enable the group to obtain full ownership and allow flexibility for "options like corporate

restructuring, acquisitions, exploring new financing structures including financial support from the promoter".

The delisting was called off in September 2022, due to non-receipt of requisite approvals. However, by then Adani Power's fortunes had turned for the better on account of improving regulatory situation, compensatory tariff claims, and claims pertaining to a coal block de-allocation.

"Receipt against such claims has boosted cash flows in the past couple of fiscals, and has reduced receivables as well as outstanding debt," a Crisil note in September 2023 said.

Adani Power says it has reallocated outstanding regulatory income for the period from FY18 to FY24 (up to December 2023) at ₹28,000 crore and two-thirds of it was received between FY22 and FY24.

This turnaround has coincided with a recording new highs in peak power demand for two consecutive summers — 2022 and 2023. Rating agency CareEdge expects India's power demand to grow at 5 to 6 per cent for the next few years. As of now, as of August, Adani Power announced plans to take its 15,200 megawatt (Mw)

capacity to 21,110 MW by FY25, which would include 1,100 Mw added through the inorganic route.

**Different strokes**

Adani Power is different from two of its primary rivals in the private power sector. Top executives from Tata Power will not make any fresh investments in the thermal power segment and will rather be existing thermal power assets at their end of life.

Even executives from JSW Energy, one of the three in the Reuters report, had told Business Standard in an earlier interaction that private sector thermal capacities were unlikely until there was scarcity of coal — essential for financial closure.

Hetal Gandhi, Lead AFAC, Energy transition-carbon capture, Woodmuckende, noted: "India is a growing economy and among the top carbon emitters globally. This places it uniquely on the energy transition agenda. There are no easy solutions and thermal power is here to stay for a while to meet rising power needs for a growing economy."

Adani Group's multiple listed entities, too, put it in a situation different from its peers. Tata and

JSW, as groups, have all their power capacities — green as well as thermal — concentrated in single entities: Tata Power and JSW Energy, respectively. Attempts to build the green assets from thermal have so far not fully fruited.

However, the Adani Group has planned its energy portfolio differently. It turned off and listed its green energy assets — Adani Green Energy — as a separate entity as early as June 2018.

Sabyasachi Majumdar, Senior Director, CareEdge Ratings, notes there is still a reasonable prospect for fresh investments in the thermal business, given India's growing demand and green energy's limitations of being intermittent and seasonal in nature. He added that for anyone taking a contrarian view, there were some risks, including equity and debt-based funding.

With two different listed entities, Adani's intent to separate out of equity investors. Debt, however, according to industry experts, remains an issue. "Jwms and financial institutions may perceive high risk to such projects," Sabyasachi added.

Crisil, which rates Adani Power, said in January that timely execution and funding of the planned capex, without impacting the capital structure or liquidity profile, would be the key. The agency expects Adani Power's capex over the next four to five fiscal years to be around ₹5-7,000 crore, with up to 70 per cent of it likely to be funded through debt and the remaining through internal accrual.

So far, Adani Power has managed the debt well, with significant improvements reported in its debt profile over the last few years (see chart). Last week, Bharat Heavy Electricals Ltd announced it had received an order worth ₹4,000 crore from Adani Power for setting up the 1,600 MW Thar Coal Power Plant at Rajasthan, Chhattisgarh. Adani Power also acquired two thermal assets through the debt resolution route in FY24.

As Adani Power hopes to re-close its 20 Gw dream, albeit a decade later than originally intended, it has reignited the fire.

# REIGNITED DREAMS

As India's power demand surges, Adani Power revives old ambitions while its fortunes turn for the better

AMRITHA PILLAY  
Mumbai, 2 April

Adani Power, part of the Adani group, plans to add close to 6 gigawatts (Gw) of new power assets in the next five years, according to an investor presentation by the company. That is clearly meant to ride on India's burgeoning power demand.

But there is another side to it: All of this new capacity is expected to be thermal power, or power produced from coal.

Adani Power is not alone in this. A Reuters report dated March 4 said Adani Power was one of three private producers — the others being JSW Group and Essar Power — to have told the

power ministry they were keen to build at least 10 Gw of coal-fired power capacity over a decade, ending a six-year drought in significant private involvement in the sector.

However, Adani's plans, said Reuters, were bigger than JSW's and Essar's. The report quoted a spokesperson for the power ministry as saying the private sector had agreed to invest in the coal-fired power sector "in line with the energy requirements of the nation," and that India was ahead of international commitments to cut emissions.

Overall, Adani Power plans to operate more than 21Gw of thermal capacity by 2028-29 (FY29), up from 15.21 Gw at present. The Adani Group's

green energy business is housed under Adani Green Energy, which has 5.614 Gw of solar capacity and 1.275 Gw of wind power, and another 2.140 Gw of hybrid.

At present, the largest power producer in the country is NTPC with 75 Gw capacity and the largest private sector player is Adani Power, with Tata Power a close second.

A spokesperson for Adani Power declined to comment on this story. However, in a call with analysts in November last year, the company called itself "debt-light" and "now poised to take off successfully for the long haul as India's power demand grows strongly in line with its economy".

## The turnaround

Adani Power intended to achieve 20 Gw capacity by 2020 as stated in some of its annual reports from FY16 onwards.

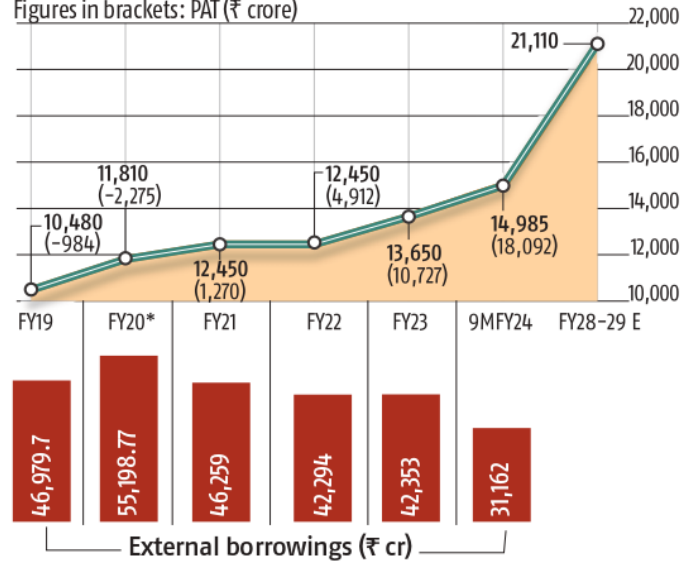

However, along the way it got caught up in concerns related to state discom health, fuel availability, and its debt situation. It did not commission any significant new capacity between FY15 and FY19, company data shows. Instead, in the year 2020, as the Covid-19 pandemic raged, the company was preparing a de-listing plan.

In May 2020, the company's promoters announced the delisting and said it would enable the group to obtain full ownership and allow flexibility for "options like corporate

restructurings, acquisitions, exploring new financing structures including financial support from the promoter".

The delisting was called off in September 2022, due to non-receipt of requisite approvals. However, by then Adani Power's fortunes had turned for the better on account of improving regulatory situation, compensatory tariff claims, and claims pertaining to a coal block deallocation.

"Receipt against such claims has boosted cash flows in the past couple of fiscals, and has reduced receivables as well as outstanding debt," a Crisil note in September 2022 said.

Adani Power pegs duty realised outstanding regulatory income for the period from FY18 to FY24 (up to December 2023) at ₹29,000 crore and two-thirds of it was received between FY22 and FY24.

This turnaround has coincided with India recording new highs in peak power demand for two consecutive summers — 2022 and 2023.

Rating agency CareEdge expects India's power demand to grow at 5 to 6 per cent for the next few years. As if on cue, last August Adani Power announced plans to take its 15,210 megawatt (Mw)

capacity to 21,110 MW by FY29, which would include 1,100 Mw added through the inorganic route.

## Different strokes

Adani Power is different from two of its primary rivals in the private power sector. Top executives from Tata Power have maintained the company will not make any fresh investments in the thermal power segment and will retire existing thermal power assets at their end of life.

Even executives from JSW Energy, one of the three in the Reuters report, had told Business Standard in an earlier interaction that private sector thermal capacities were unlikely until there was surety of off-take — essential for financial closure.

Hetal Gandhi, Lead APAC, Energy transition-carbon capture, Woodmackenzie, noted: "India is a growing economy and among the top carbon emitters globally. This places it uniquely on the energy transition agenda. There are no easy solutions and thermal power is here to stay for a while to meet rising power needs for a growing economy."

Adani group's multiple listed entities, too, put it in a situation different from its peers. Tata and

JSW, as groups, have all their power capacities — green as well as thermal — concentrated in single entities: Tata Power and JSW Energy, respectively. Attempts to hive the green assets from thermal have so far not fully fruited.

However, the Adani Group has planned its energy portfolio differently. It hived off and listed its green energy assets — Adani Green Energy — as a separate entity as early as June 2018.

Sabyasachi Majumdar, Senior Director, CareEdge Ratings, notes there is still a reasonable prospect for fresh investments in the thermal business, given India's growing demand and green energy's limitations of being intermittent and seasonal in nature. He added that for anyone taking a contrarian view, there were some risks, including equity and debt-based funding.

With two different listed entities, Adani caters to a separate set of equity investors. Debt, however, according to industry experts, remains an issue. "...banks and financial institutions may perceive high risk to such projects," Sabyasachi added.

Crisil, which rates Adani Power, said in January that timely execution and funding of the planned capex, without impacting the capital structure or liquidity profile, would be the key. The agency expects Adani Power's capex over the next four to five fiscal years to be around Rs 47,000 crore, with up to 70 per cent of it likely to be funded through debt and the remaining through internal accrual.

So far, Adani Power has managed the debt well, with significant improvements reported in its debt profile over the last few quarters (see chart). Last week, Bharat Heavy Electricals Ltd announced it had received an order worth Rs 4,000 crore from Adani Power for setting up the 1,600 MW Thermal Power Plant at Raigarh, Chhattisgarh. Adani Power also acquired two thermal assets through the debt resolution route in FY24.

As Adani Power hopes to realise its 20 GW dream, albeit a decade later than originally intended, it has reignited the fire.

# बैजूस : 500 कर्मी निकाले गए

## एचआर विभाग ने फोन कॉल और उसके बाद ईमेल संदेश के जरिये कर्मचारियों को निकाला

पीरजादा अबरार

बंगलूरू, 2 अप्रैल

नकदी किल्लत से जूझ रही बैजूस लगभग 500 कर्मचारियों को छंटनी कर दी, जो उसके कुल कर्मचारी आधार का करीब 3 प्रतिशत है। जानकारों के अनुसार कंपनी ने व्यावसायिक पुनर्गठन पहले के तहत यह कदम उठाया है, क्योंकि उसे गंभीर नकदी किल्लत, निवेशकों और ऋणदाताओं से टकराव का सामना करना पड़ रहा है।

छंटनी के नए राउंड से मुख्य तौर पर कंपनी में बिक्री, विपणन और शिक्षण से जुड़ी जिम्मेदारियां संभालने वाले लोग प्रभावित होंगे। कंपनी के कुल कर्मचारियों की संख्या लगभग 15,000 है।

छंटनी का नया दौर कंपनी द्वारा लगभग 4,500 कर्मचारियों को नौकरी से निकालने के लिए पिछले साल शुरू की गई पुनर्गठन प्रक्रिया का हिस्सा है। इन योजनाओं को अर्जुन मोहन द्वारा अंतिम रूप दिया गया है जिन्हें पिछले साल मृणाल मोहित की जगह भारतीय व्यवसाय के मुख्य कार्याधिकारी (सीईओ) के रूप में पदेनत किया गया था। पिछले साल अक्टूबर से नवंबर के बीच करीब 3,000 लोगों को बाहर का रास्ता दिखाया गया।

हालांकि छंटनी के नए राउंड में कंपनी

■ बंगलूरू की इस फर्म में करीब 15,000 कर्मचारी हैं

■ छंटनी के नए दौर से बिक्री, विपणन, शिक्षण से जुड़े कर्मचारी प्रभावित

उसके बाद इस बारे में एक ईमेल भी आया। कर्मचारी इस बात से दुखी हैं कि संदेश के जरिये स्टाफ को निकाल दिया था। इस घटनाक्रम से अवगत लोगों का कहना है कि कंपनी ने उन्हें तुरंत बाहर निकलने की प्रक्रिया शुरू की और उन्हें सूचित किया कि उनका आज अंतिम कार्य दिवस था।

एक व्यक्ति ने कहा, 'कर्मचारियों के पास एचआर विभाग के अधिकारी से कॉल आया और उन्हें बताया गया कि आज उनका लास्ट वर्किंग डे है और

इसके लिए कंपनी की कमजोर वित्तीय स्थिति को जिम्मेदार बताया।

एक व्यक्ति ने कहा, 'कर्मचारियों में तनाव है। बैजूस ने लगातार दूसरे महीने अपने कर्मचारियों का वेतन रोकने का फैसला किया है। कंपनी को पिछले कुछ समय से कर्मचारियों द्वारा नौकरी छोड़कर चले जाने की समस्या से जूझना पड़ रहा था, लेकिन रोजगार बाजार चुनौतीपूर्ण है जिस वजह से उनके लिए नई नौकरी तलाशना मुश्किल हो रहा है।'

कंपनी ने छंटनी की पुष्टि कर दी है, लेकिन इस बारे में किसी आंकड़े का खुलासा नहीं किया है।

बैजूस के एक अधिकारी ने कहा, 'हम परिचालन ढांचा आसान बनाने, लागत आधार घटाने और बेहतर नकदी प्रवाह प्रबंधन के लिए अक्टूबर 2023 में घोषित व्यावसायिक पुनर्गठन पहले के आखिरी चरणों में हैं। जैसा कि आप जानते हैं कि हम चार विदेशी निवेशकों के साथ मौजूदा कानूनी लड़ाई को जूझ रहे से कंपनी में विपरीत हालात से जूझ रहे हैं, जिसमें हरेक कर्मचारी और तंत्र को मौजूदा स्थिति को देखते हुए तनाव के दौर से गुजरना पड़ रहा है।'

वर्ष 2022 में एक समय बैजूस के कर्मचारियों की संख्या बढ़कर करीब 50,000 पर पहुंच गई थी, जिसमें एडटेक फर्म की विभिन्न सहायक इकाइयों के कर्मी भी शामिल थे।

नागरिक विमानन महानिदेशालय (डीजीसीए) ने मंगलवार को विस्तारा से कहा कि वह उन उड़ानों की संख्या बताए जिनमें पायलटों की कमी के कारण देरी हुई है और जिन्हें रद्द किया गया है। एयरलाइन ने सोमवार को करीब 50 उड़ानें रद्द कर दीं और मंगलवार को कम से कम 52 अन्य उड़ानों को रद्द कर दिया। सूत्रों के अनुसार इसका कारण मुख्य रूप से एयर इंडिया में विस्तारा के विलय के कारण नए वेतन ढांचे के विरोध में पायलटों का बर्तान पड़ना है। विस्तारा आमतौर पर रोजाना करीब 350 उड़ानें

संचालित करती है।

डीजीसीए ने मंगलवार को कहा, 'चालक दल की अनुपलब्धता समेत विभिन्न कारणों से विस्तारा की उड़ानों में बाधाओं को देखते हुए डीजीसीए ने एयरलाइन को रद्द और विलंब वाली उड़ानों के बारे में रोजाना जानकारी देने को कहा है।'

नियामक ने कहा कि एयरलाइन को विशेष नियमों सीएआर का ध्यान रखना चाहिए। सीएआर के तहत वे सुविधाएं आती हैं जो यात्रियों को दी जानी जरूरी है लेकिन उड़ानों के रद्द होने या विलंब से या बोर्डिंग से इनकार करने से ये सुविधाएं प्रभावित हुई हैं। उसने कहा कि प्रभावित यात्रियों को अग्रिम सूचना, रिफंड का विकल्प, यदि लागू हो तो मुआवजा दिया जाना चाहिए।

नियामक ने कहा, 'डीजीसीए के अधिकारी सीएआर का अनुपालन सुनिश्चित करना और यात्रियों को सुविधाओं का ध्यान में रखते हुए हालात पर नजर बनाए हुए है।' नागरिक विमानन मंत्रालय (एमओसीए) ने भी मंगलवार की सुबह इस मामले पर चिंता जताई। मंत्रालय ने कहा, 'मंत्रालय विस्तारा की रद्द उड़ानों के मामले पर नजर रख रहा है। हालांकि उड़ानों का प्रबंधन स्वयं विमानन कंपनी कर रही है।

## वित्त वर्ष 24 में ईवी की पैठ 6.8 प्रतिशत स्तर तक पहुंची

नई दिल्ली, 2 अप्रैल

सब्सिडी में कटौती और नियामकीय बदलावों के बावजूद वित्त वर्ष 2024 में इलेक्ट्रिक वाहन (ईवी) की बिक्री में 4.1 प्रतिशत से ज्यादा की दमदार वृद्धि नजर आई है। वित्त वर्ष 24 में कुल ईवी पंजीकरण का आंकड़ा 16 लाख का आंकड़ा पार कर गया, जो पिछले वर्ष के 11 लाख से कुछ ही अधिक के आंकड़े से काफी ज्यादा है। इस सबसे देश में ईवी की कुल पैठ वित्त वर्ष 23 के 5.3 प्रतिशत की तुलना में बढ़कर 6.8 प्रतिशत हो गई है।

जून में फास्टर एडॉप्शन पेंड मैनुफैक्चरिंग इलेक्ट्रिक व्हीकल्स (फेम) योजना के तहत सब्सिडी घटाकर ई-दोपहिया पर दी जाने वाली अधिकतम 66,000 सब्सिडी का एक-तिहाई करने के सरकार के फैसले के बावजूद यह बढ़ोतरी हुई। ई-दोपहिया के मामले में अधिकतम सब्सिडी प्रति वाहन 22,500 रुपये तक सीमित करने

को नई इलेक्ट्रिक परिवहन संवर्धन योजना (इएमपीएस), 2024 से तब्दील कर दिया।

वित्त वर्ष 24 में ई-तिपाध्या श्रेणी ने 48.9 प्रतिशत हिस्सेदारी

हासिल करते हुए खासी बड़ी बाजार पैठ का प्रदर्शन किया, हालांकि इस श्रेणी में सर्वाधिक ईवी पैठ होने के बावजूद यह वित्त वर्ष 23 के 51.6 प्रतिशत के आंकड़े से कम हो गई, जिसकी मुख्य वजह तिपाध्या वाहनों की कुल बिक्री वृद्धि रही।
